High image quality All-in-One    Digital Photo All-in-One

*Exceptional photo quality  
and elegant design*

OFFICIAL PARTNER

## *All you need for ease and efficiency*

Get photo quality colour printing, scanning and copying in one single, stylish unit with the SmartBase MP360. Or gain all that and even more with the SmartBase MP370 - and enjoy easy, direct photo printing from your digital camera.

### **SMARTBASE MP360:**

#### **HIGH IMAGE QUALITY ALL-IN-ONE**

Why buy three machines and waste money and space when you can have photo quality printing, scanning and copying in one ultra compact unit. Combining elegance and ease, the SmartBase MP360 delivers exceptional colour quality complete with borderless printing - for work, university assignments, school projects or whatever you want to do.

### **SMARTBASE MP370:**

#### **DIGITAL PHOTO ALL-IN-ONE**

If you own a digital camera or if you are planning to buy one then choose the SmartBase MP370 for convenience and ease. It offers all the features of the SmartBase MP360 with the added advantage of camera direct photo printing with PictBridge and Canon Bubble Jet Direct support. Or there's card direct photo printing with a practical Photo Index Sheet. All without the need for a PC.

*QUALITY & STYLE*

# Producing perfect, photo quality images

Both SmartBase models deliver superb, photo quality printing, scanning and copying. So you can rely on consistently clear, sharp details and bright, bold colours for all your images.

## PHOTO QUALITY PRINTING WITH UNIQUE CANON TECHNOLOGY

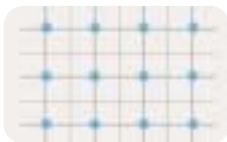

Canon technology ensures excellent colour quality for first class results. Each model uses a print head containing micro-nozzles that eject tiny 2 picolitre ink droplets with extraordinary precision. This advanced MicroFine Droplet Technology™ means that you get the highest print quality - right up to a 4800 x 1200 dots per inch resolution. Providing true-to-life colours, detailed images and crisp, clear text, on both plain and photo paper.

**Conventional/Competitors**

**Advanced MicroFine Droplet Technology™**

*Traditional ink jet printing systems may deliver droplets of irregular placement and shape. Canon's Advanced MicroFine Droplet Technology™ improves the control process for droplet ejection, delivering consistent drops with exact form and placement.*

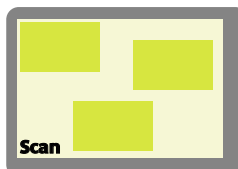

## FAST, BORDERLESS PRINTING

Printing or copying photos usually results in a white frame around the edge of the paper. With the SmartBase models, you can print right up to the paper's edge, without any border. And by using special photo or glossy paper you can produce ready-to-frame photographs on A4, 4" x 6" and 5" x 7" sizes. Plus printing is fast, without compromising colour quality.

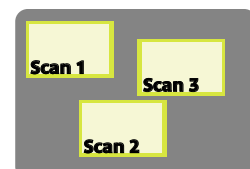

## SUPERIOR SCANNING & COPYING

Your SmartBase machine offers outstanding black-and-white or colour copies, at a fast speed. A special CCD sensor produces a high 1200 x 2400 dots per inch resolution for a perfect finish of scanned materials. You can scan photos, or even pages of thick books and magazines, thanks to the handy Z-lid. Scan several photos all in one go using the Multi-Photo mode and save time. The images are then separated and stored as individual files, so you can easily e-mail them to friends.

**One scan run without Multi-Photo mode.**

**One scan run on the SmartBase MP360 / SmartBase MP370 with Multi-Photo mode.**

## Print direct from your digital camera

With the SmartBase MP370 you can also take advantage of quick and easy photo printing direct from your digital camera or from memory cards. There's no need to use a PC, just connect your camera or insert the memory card and print your selected pictures straight away.

### NEW PICTBRIDGE SUPPORT FOR CAMERA DIRECT PHOTO PRINTING

Why wait around when you can print photos fast, easily and in all formats, using the SmartBase MP370. Print directly from PictBridge or Canon Bubble Jet Direct compatible digital cameras and camcorders (PictBridge is a new industry standard ensuring easy printing with a wide range of compliant products). Making direct photo printing a joy to use, while letting you print and share your favourite photos almost instantly.

**CONNECT**  
Directly connect your PictBridge or Canon Bubble Jet Direct camera to the to the SmartBase MP370.

**SELECT**  
Select your photo, layout and number of prints on your digital camera's LCD screen.

**PRINT**  
Press 'print' and your photos are ready - without the need for a PC

### DIRECT PHOTO PRINTING FROM MEMORY CARDS

Simply slide your memory card into the built-in card reader slot of the SmartBase MP370 and print the photos you want directly, via the easy-to-use control panel. You can print in several different formats including fast, borderless printing. Alternatively, as you'll see, you can simply select your photos using Canon's new Photo Index Sheet.

### CONVENIENT PHOTO INDEX SHEET

When printing directly from memory cards, the SmartBase MP370 can print out a Photo Index Sheet showing all your photos. Simply use a pen to mark the ones you want to print with their settings. The scanner then reads the sheet and automatically prints out your selected photographs. Unlike most other Photo Index Sheets you only have to mark two fields, you can select up to three prints per photo and, if you mark a sheet incorrectly, you just need to reprint that one sheet instead of the entire range of Photo Index Sheets. It's that easy to print your own photos on the SmartBase MP370!

## *Saving you time in the simplest way*

Whether you choose the SmartBase MP360 or the SmartBase MP370, you benefit from time-saving ease and efficiency - all in an elegant, compact design.

SMARTBASE MP360

SMARTBASE MP370

Print Tray opens up automatically when printing or copying starts

### **STRIKING, SEDUCTIVE DESIGN WITH PRACTICAL AUTOMATIC PRINT TRAY**

The SmartBase MP360 and MP370 look as good as the photo quality prints they produce. The striking, seductive Z-shape design adds a touch of class to any surroundings, while also saving space. An ingenious Print Tray opens up automatically when printing or copying starts, to catch your prints. With its strong focus on style, this is one machine you'll display with pride.

### **HIGH SPEED PERFORMANCE**

With either SmartBase model, there's no waiting around, no wasting time. You can print and copy at a fast 18 pages per minute for black and white output or 12 pages per minute in colour. And your 4" x 6" borderless colour photo is quickly printed in just over a minute.

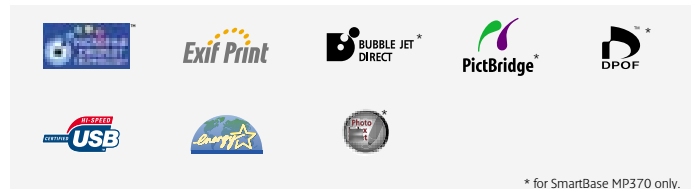

### **TIME-SAVING CONNECTIVITY**

Both models are compatible with all popular Windows operating systems. A USB 2.0 Hi-Speed interface ensures easy connectivity and allows large amounts of data to be speedily transferred between the SmartBase and your PC. This saves you precious time when scanning images at a high resolution.

# SmartBase MP360 / SmartBase MP370 Specifications

<b>Type</b>	
<b>Available functions</b>	Print, Scan, Copy, Camera Direct Print, Card Direct Print
<b>Printer functions</b>	
<b>Printing method</b>	Bubble Jet 4-ink with Micro-Nozzles, Advanced MicroFine Droplet Technology™
<b>Mono print speed</b>	Up to 18ppm (Max), 12 ppm (Std) <sup>1</sup>
<b>Colour print speed</b>	Text & Graphics: Up to 12 ppm (Max), 5 ppm (Std); A4 Full Page: Up to 0.8 ppm (Std) <sup>1</sup>
<b>Photo print speed</b>	A4: Up to 0.33 ppm [Std on PR-101]; 4"x6" [10x15cm]: 62 seconds [Std on PR-101] <sup>1</sup>
<b>Print resolution</b>	4800 x 1200 dpi
<b>Cartridge configuration</b>	Black ink tank: BCI-24 Black Colour ink tank: BCI-24 Colour
<b>Black ink tank life</b>	130 pages at 5% coverage <sup>2</sup> 580 pages [printing ISO/JIS-SCID N5 image] <sup>3</sup>
<b>Colour ink tank life</b>	160 pages at 5% coverage per ink tank <sup>2</sup> 160 pages [printing ISO/JIS-SCID N5 image] <sup>3</sup>
