FAX-B160

*Can I have a fax
to rely on?*

Can I have a fax to rely on?

With the new FAX-B160 from Canon, you can. Using Canon's tried and trusted Bubble Jet Engine technology, the FAX-B160 gives you quality plain paper faxes time after time. Add to that its 20 sheet Automatic Document Feeder, its high transmission speed and many other features designed with the small and home office in mind, and you will find the FAX-B160 a truly trustworthy partner.

YOU CAN HAVE RELIABILITY

Whether receiving or transmitting, you can depend on the FAX-B160 to get on with the job. Comfortably handling 100 sheets of paper at a time and with a 20 sheet Automatic Document Feeder, the FAX-B160 also features Error Correction Mode which prevents damaged images that can occur when transfer takes place on a bad phone line.

YOU CAN HAVE CRISP, CLEAR IMAGES

The FAX-B160's Ultra High Quality Image Processing Mode means images are always clearly defined and greyscales evenly graduated. Printing at 360 dpi, printouts from the FAX-B160 do not show any unwanted stepping effect.

YOU CAN SAVE TIME AND MONEY

Transmission time with the FAX-B160 is a speedy 6 seconds per page, meaning less time spent on the phone line and of course, less money on your bill. With one touch dialling and Dual Access Function valuable time is saved. Delayed transmission, which lets you send faxes during cheaper periods, and Ink Saver Mode help keep your costs down.

YOU CAN HAVE CONVENIENCE

With its 42 page memory and bright LCD display, the FAX-B160 lets you scan transmissions quickly and easily and send them out when you like. The FAX-B160 even goes on working if its ink cartridge runs out or you forget to load it with paper simply storing incoming faxes and printing them out later. You'll never miss an important fax again.

Clear and easy to operate controls.

One BX-20 cartridge can print up to 2000 pages.

Crisp, clear images thanks to Bubble Jet technology.

Optional telephone.
